Company Descriptions

AUDIENCE	LENGTH	WORDS
General	Long	177

neurocat was born in 2017 out of a desire to take ML robustness testing for safety-critical application to a new level. With a background in mathematics, our founders were not blinded by AI hype. It was not magic, it was statistics ... but optimization was required.

The young neurocat consulted on such optimization, bootstrapping its growth and writing the first ever AI quality standard. This got attention, and led to our first customer, German automobile manufacturer Volkswagen, from which came our first patents and publications.

With our vision validated, and a growing team of coders turning standards and math into a tool, neurocat was now a start-up with more than just an idea, and this attracted investors. dSPACE entered the neurocat story in 2021 as a new strategic partner and investor.

Today, with a team of over 40 persons neurocat is implementing its strategic vision: to scale enabling safe AI with a software that captures our expertise. This software is aidkit, built to improve the robustness of the computer vision systems at the heart of autonomous vehicles.

AUDIENCE	LENGTH	WORDS
General	Medium	74

neurocat provides innovative solutions to ensure compliant and comprehensive AI systems for the automotive and mobility sector.

Through our aidkit software solution we enable companies to identify vulnerabilities and data gaps in their ML models in order to mitigate risk while maximizing coverage of the different scenarios their systems will encounter.

AI is changing the way the world moves; neurocat makes sure you get home safe no matter what the world throws at you.

AUDIENCE	LENGTH	WORDS
General	Short	24

neurocat solutions ensure compliant and comprehensive automotive perception systems.

AI is changing the way the world moves; neurocat makes sure you get home safe.
